By the fig and olive, And the mount of Sinai, And the city of security. We have indeed created man in the best of moulds. Then do we abase him (to be) the lowest of low. Except such as believe and do righteous deeds for they shall have a reward unfailing. What then, can after this, make you deny the last judgement. Is not Allah the wisest of judges”
(Surah At Tin 95:1-8)

The Prophet Muhammad (صلى الله عليه و سلم) said:

“Eat the olive oil and massage it over your bodies since it is a holy (Mubarak) tree.”

Olive oil is a good preservative for other eatables too. Sardine and other fishes are tinned and preserved in olive oil. The smoke-less burning of olive oil is a peculiar feature, which produces a bright light.

Qur'an stresses the importance of olive on several occasions as follows:

SIWAAK

Encouragement to use the Siwak as part of the Sunnah is mentioned in many hadeeths, and the effect of using the Siwak is described as purifying the mouth, cleansing it of dirt, making it smell good and preventing disease. It is a general word which affirms that Siwak possesses all powers of purification and protection.

The Prophet Muhammad (صلى الله عليه و سلم) said:

“Siwak is purifying for the mouth and pleasing to the Lord.”

(An Nasaa'i, hadeeth number 5; Bukharee narrated it as a mu'allaq majzoom report in Kitab Al Sawm, Bab Siwak Al Ratab Wal Yaabis li'l Saa'im; It was classed as Saheeh by Al Mundhirī in Al Targheeb Wa'l Tarheeb, Vol 1, Page 133 and classed as hasan by An Nawawi in Al Majmoo, Vol 1, Page 267)

Prof. Dr. Muhammad Sa'eed Al Jareedli (Head of the Mouth Disease department at Cairo University) said:

The Siwak is many times better than the toothbrush and toothpaste in chemical and mechanical terms.

After carrying out research he found that the substance which is in the Siwak kills germs and heals our mouths from disease. By itself it can take the place of the toothbrush and toothpaste because of the numerous substances it contains which are superior to those contained in toothpaste.

Similarly, strong, gentle natural fibres work better than the fibres of the toothbrush and do not damage the gums. They also effectively remove what is left in our mouths and clings to our teeth of leftover food, which can cause disease and damage to the mouth and teeth.

Up until today, in our civilised world, there is no toothpaste that contains the substances contained in the Siwak. For example, we see that most of the toothpastes on the market are commercial and cheap, aimed at nothing other than making a profit, and the mouth and gums do not benefit from them at all.

But in the case of Siwak, it was found — after scientific research — that it contains a lot of effective substances carried in its fibres, including cleansers such as sinigrin, astringents which strengthen the gums, such as Gallic acid, volatile oils which give the mouth a good smell, sodium chloride, sodium bicarbonate, potassium chloride, calcium oxalate and a number of substances which clean the teeth.

Some substances in the Siwak also kill germs, so it has an effect similar to that of penicillin.

SURAH IKHLAS, FALAQ & NAAS
